

# Decompression of stdlib level-6 streams

Each backend decodes identical compressed bytes · common logarithmic axes

RTX 3090 + Threadripper PRO 3995WX · same workstation · 2026-10-06

Warm medians; 5 CUDA / 3 CPU samples; error bars = sample min-max, not confidence intervals. Cold startup excluded.

API output allocations included; payload generation, initial resident uploads, and correctness checks excluded.
