

Compressed size at 64 MiB

Complete encoded stream size as a percentage of the original input

RTX 3090 + Threadripper PRO 3995WX · same workstation · 2026-10-07

Encoded percentages include all stream framing; lower is smaller. 100% means no size reduction. Labels rounded to 0.001%.

CUDA uses independent 32 KiB chunks; stdlib zlib levels 1 and 6 are comparison settings, with no level equivalence implied.
