

Decompression of stdlib level-6 streams

Each backend decodes identical compressed bytes · common logarithmic axes

RTX 3090 + Threadripper PRO 3995WX · same workstation · 2026-10-10

Warm medians; 15 CUDA / 5 CPU samples; error bars = sample min-max, not confidence intervals. Cold startup excluded.

API allocations and codec validation included; payload generation, initial resident uploads, and post-timing oracle comparisons excluded.
